

BIOPHILIA Form for Disclosure of Potential Conflicts of Interest

Instructions P1-2

[Form down road](#): The form is in six parts/ Sections.

This form bases on ICMJE Form for Disclosure of Potential Conflicts of Interest.

The purpose of this form is to provide readers of our manuscript with information about your other interests that could influence how they receive and understand your work. The form is designed to be completed electronically and stored electronically. Each author should submit a separate form and is responsible for the accuracy and completeness of the submitted information.

Section 1. Author information.

1. Given Name (First Name)
2. Surname (Last Name)
3. Date (mm dd, yyyy)
4. Are you the corresponding author? Yes No
5. Manuscript Title
6. Manuscript Identifying Number (if you know it)

Section 2. The Work Under Consideration for Publication

This section asks for information about the work that you have submitted for publication. The time frame for this reporting is that of the work itself, from the initial conception and planning to the present. The requested information is about resources that you received, either directly or indirectly (via your institution), to enable you to complete the work. Checking "No" means that you did the work without receiving any financial support from any third party -- that is, the work was supported by funds from the same institution that pays your salary and that institution did not receive third-party funds with which to pay you. If you or your institution received funds from a third party to support the work, such as a government granting agency, charitable foundation or commercial sponsor, check "Yes".

Section 3. Relevant financial activities outside the submitted work.

This section asks about your financial relationships with entities in the bio-medical arena that could be perceived to influence, or that give the appearance of potentially influencing, what you wrote in the submitted work. You should disclose interactions with ANY entity that could be considered broadly relevant to the work. For example, if your article is about testing an epidermal growth factor receptor (EGFR) antagonist in lung cancer, you should report all associations with entities pursuing diagnostic or therapeutic strategies in cancer in general, not just in the area of EGFR or lung cancer. Report all sources of revenue paid (or promised to be paid) directly to you or your institution on your behalf over the 36 months prior to submission of the work. This should include all monies from sources with relevance to the submitted work, not just monies from the entity that sponsored the research. Please note that your interactions with the work's sponsor that are outside the submitted work should also be listed here. If there is any question, it is usually

better to disclose a relationship than not to do so. For grants you have received for work outside the submitted work, you should disclose support ONLY from entities that could be perceived to be affected financially by the published work, such as drug companies, or foundations supported by entities that could be perceived to have a financial stake in the outcome. Public funding sources, such as government agencies, charitable foundations or academic institutions, need not be disclosed. For example, if a government agency sponsored a study in which you have been involved and drugs were provided by a pharmaceutical company, you need only list the pharmaceutical company.

Place a check in the appropriate boxes in the table to indicate whether you have financial relationships (regardless of amount of compensation) with entities as described in the instructions. Use one line for each entity. You should report relationships that were present during the 36 months prior to publication.

Section 4. Intellectual Property -- Patents & Copyrights

This section asks about patents and copyrights, whether pending, issued, licensed and/or receiving royalties.

Section 5. Relationships not covered above

Use this section to report other relationships or activities that readers could perceive to have influenced, or that give the appearance of potentially influencing, what you wrote in the submitted work.

Are there other relationships or activities that readers could perceive to have influenced, or that give the appearance of potentially influencing, what you wrote in the submitted work?

Yes, the following relationships/conditions/circumstances are present (explain below):

No other relationships/conditions/circumstances that present a potential conflict of interest

At the time of manuscript acceptance, journals will ask authors to confirm and, if necessary, update their disclosure statements.

On occasion, journals may ask authors to disclose further information about reported relationships.

Section 6. Disclosure Statement, please fill in your statement in frame.

Based on the above disclosures, this form will automatically generate a disclosure statement, which will appear in the box below.
